Tattoo 'd U
*a natural way
to help heal
and protect
your tattoo*

**Natural
and
Organic**

What it doesn't

have -

Lanolin and

Petroleum

based products are known to be inferior for the healing of tattoos.

They have been known to produce a far greater risk of reaction, excessive seeping, and scabbing which can result in color loss.

Whats in it?

Hemp Seed Oil -

a natural anti-inflammatory that helps to heal skin lesions, balance dry skin and fight skin inflammation

Calendula - a natural

antimicrobial acting herb that is soothing to inflammation, controls bleeding and heals damaged tissue where skin is broken

Jojoba Oil - an

antimicrobial that discourages the growth of some fungal and bacterial microbes

Zinc Oxide -

protection against UV rays, and when applied to a wound area, gives the body the extra zinc to repair the skin cells

Vitamin E - an

antioxidant that protects and repairs your skin as well as a natural preservative

Beeswax - natural

preservative and moisturizer
